Mansfield, Ohio 44903

Dear Mr. Weist,

I wanted to thank you for getting the two gearboxes re-designed, refurbished, and done early while maintaining the high quality we have come to expect from your products. These gearboxes were critical for putting ground support equipment, necessary for testing aircraft electrical systems, in operation which helped to keep our production schedule on track. Michael Byrne Manufacturing's suggestions for the re-design have the gearbox performing well and running very quietly. We are confident the gearboxes will last as long between servicing as the last two (over twenty years of productivity before any major service), and we look forward to working with Michael Byrne Manufacturing in the future.

Regards,

Ken Thomson
